

GET MORE OUT OF LIFE – AUTOMATE YOUR NUTRIENT MANAGEMENT

If you hate cleaning your reservoir, or wish you didn't have to hand water, then you'll love Easy Feed Systems. This customizable, modular system provides precise, automated nutrient injection. It's reservoir-free, easy to install, and unlike any other system on the market today.

- ◆ **RESERVOIR-FREE:** In-line nutrient management provides a precise mix every time. Direct-inject straight from concentrate, or use the system to fill reservoirs or hand water with fertilizer water.
- ◆ **EASY TO USE AND MAINTAIN:** Adjust your nutrient mix with the twist of a dial. Do-it-yourself maintenance is easy and hassle-free with continuous in-line pH, EC/TDS metering.
- ◆ **SAVE TIME AND MONEY:** Precise chemical management equals less money spent on chemical, and less time spent on fertigation.

LEARN HOW EASY FEED CAN INCREASE YOUR YIELD TODAY

THE RESERVOIR KILLER!

All Easy Feed Systems use genuine Dosatron injectors. Dosatron is the inventor of the original, water-powered chemical injector and an established leader in the industry.

HOW IT WORKS

These water-powered, non-electric chemical injectors are the easiest, most reliable way to accurately inject chemicals into water lines. The injectors work using volumetric proportioning, ensuring that the chemical mixture remains the same regardless of variations in pressure and flow. When water enters the injector, it triggers the hydraulic motor, which begins moving up and down inside the body of the injector. On the up stroke, the injector draws fluid up from the concentrate tank in an action similar to a hypodermic syringe. On the down stroke, the concentrate is displaced into the mixing chamber, where it is mixed with the water flowing through the unit. Then the water-and-chemical mixture is discharged into the water lines.

EASY FEED SYSTEMS:

- Allows anyone to become a systemic farmer
- Works indoors, outdoors and in greenhouses
- Injects any concentration under 35 ml/gallon
- Operates with low, high, or inconsistent pressure

AVAILABLE OPTIONS:

- Low pressure kit
- Automated weekly flush line
- Flood/rain sensor
- Inline mixer
